

MEETING YOUR NEEDS DURING UNCERTAIN TIMES

CREATIVE SECURITY SOLUTIONS

At SCIS, we understand there are unique challenges related to the COVID-19 pandemic facing organizations. Striking a balance between operational security and essential business needs is a challenge that all levels of leadership are working to achieve. **Ensuring the safety and security of our personnel, our client's employees and U.S. Government assets is, and always has been, our primary mission focus.**

Through a combination of **people, technology and knowledge**, SCIS provides creative security solutions for the new and the evolving needs of our customers. We offer fully integrated technology enabled support alternatives, as well as stand-alone rapidly deployed devices to enhance coverage options and limit exposure risks.

Operational Security

In addition to offering a full suite of regulated physical security services, SCIS personnel can provide additional facility support through access control in response to **COVID-19 related personnel and temperature screening** and additional access control procedures. Augmented through our technology offerings, real time incident management level informational tools can provide awareness and quick response capabilities to all levels of operations.

Mobile security patrols offer an effective and economical way to ensure the security of your facilities with limited or reduced presence or occupancy. Services may include alarm response, inspections, employee escorts, and more services without the cost associated with a static officer. Securitas has the largest mobile patrol footprint in North America.

Technology Solutions

Available for deployment as standalone or integrated or connected remotely, a number of potential video enabled technology solutions to adding or preserving the desired security posture during this time of heightened concern.

Visitor Management System – a virtual lobby environment to limit the amount of physical contact and preserve access/egress data.

Remote Guarding – highly trained remote guarding officers observe, report and respond to your facility incidents. This service can be utilized as a visitor management utility as well as additional facility security and protection for any environment.

Cellular Video – quickly deployed cellular video applications that can be utilized to add security and be implemented quickly without civil works. Optional connectivity to a real live remote guarding officer optional.

Emergency Management Solutions

SCIS provides trained emergency medical, firefighting and consulting services to our customers in support their environmental, health and safety and duty of care program requirements.

- EMT/Paramedics
- Decontamination/Disinfecting
