

Global Protection at a Moment's Notice: Emergency Response Solutions

When disaster strikes, every second counts. Our Emergency Response solutions offer rapidly deployable, specialized assets to help your organization respond to and recover from all types of threats and hazards, even under the most austere conditions.

Armed/Unarmed Response Protection

Whether it's a natural disaster, public health emergency, civil unrest, or threat/act of violence, our global network of highly trained and experienced protectors allows us to respond quickly and reliably to safeguard your assets.

Emergency Evacuation

When traveling or living outside the United States, it's important to have an exit strategy in the event of a crisis. Offering a global network of resources, we are highly experienced with rapid and large-scale evacuations. Our local personnel know the language and terrain and have relationships with authorities and emergency service providers to quickly get your personnel out of harm's way.

Damage Assessments

In the aftermath of a disaster, it can be difficult to get an accurate picture of its impact. Our team of intelligence analysts and field specialists can assist you with collecting information on the locations, nature, and severity of damage sustained, so you can begin the recovery process.

Unmanned Aircraft Systems

An aerial perspective can provide critical infrastructure owners and operators, security professionals, and first responders enhanced situational awareness while maintaining a safe standoff distance from hazards. Our national partner network of FAA-certified UAS flight teams can be quickly deployed to perform asset inspections, disaster response, and other complex operations.

Emergency Medical Services

Early intervention is critical in a medical emergency. Our national partner network of licensed emergency medical service (EMS) professionals provide clients the onsite medical

expertise, equipment, and supplies needed to render rapid first response and patient care for injuries and illnesses on projects of all sizes and scopes.

Mobile Command & Connectivity

Establishing command, control, and communications in an emergency or a disaster is critical to managing an effective response. Through our national partner network, we offer mobile command vehicles and man-portable voice and data communications platforms that can be dispatched to any situation.

Humanitarian Assistance

Our global network of resources is available to support U.S. Government and non-governmental organization (NGO) humanitarian assistance efforts at a moment's notice in some of the world's most dangerous places, ensuring that life-sustaining aid reaches communities affected by natural disasters, conflicts, and other crises.

Paragon: A Trusted Partner

Paragon provides innovative, cost-effective solutions working to ensure the safety and security of the assets of the U.S. Government and its contractors worldwide. We have been recognized repeatedly for excellence in National Industrial Security Program (NISP) compliance, including the prestigious James S. Cogswell Outstanding Industrial Security Achievement Award, and are SAFETY Act certified.
