

COMPREHENSIVE INVESTIGATIONS SUPPORTING EVIDENCE-BASED DECISIONS

Paragon offers the full spectrum of investigative services, performed with the utmost discretion, professionalism, and integrity, to help you make evidence-based decisions.

Our Expertise

In our work with federal clients, such as the Defense Counterintelligence and Security Agency (DCSA), U.S. Customs and Border Protection (CBP), U.S. Immigration and Customs Enforcement (ICE), and the U.S. Intelligence Community (IC), our focus is to collect and report information on federal civilian, military, and contractor personnel regarding their suitability and eligibility for positions of trust and/or access to classified information.

In addition, we provide field and centralized investigations, automated records results, and support personnel to aid the Federal Government and its cleared contractors in their investigative staffing and evidence-based decision-making process.

Highly Trained National Footprint

Paragon has an established network of over 1,000 National Training Standard (NTS) certified investigative personnel across the U.S. that enables us to complete investigations and inspections in any location.

Our field force is led by regional management and supported by a centralized Program Management Office (PMO) located in the Washington, DC, area to provide oversight and promote performance at a scalable and sustainable level.
